

<b>Company</b>	Trenz Electronic GmbH
<b>PCN Number</b>	PCN-20191217
<b>Title</b>	PCN-20191217 TE0722-01 to TE0722-02 Hardware Revision Change
<b>Subject</b>	Hardware Revision Change
<b>Issue Date</b>	20191217

## Products Affected

---

This change affects all Trenz Electronic TE0722-01 modules.

## Changes

---

### #1 Changed voltage sense circuit of supervisor to sense 1.0V power rail: Replaced R7 by 10K and R15 by 19K1

---

**Type:** SCH change

**Reason:** XILINX recommendation use VCCINT (1.0V) for sensing.

**Impact:** None, reset is asserted when VCCINT is below approx 0.84V.

### #2 Added series resistors (33 Ohm) to RGB led (R29 .. R31)

---

**Type:** SCH change

**Reason:** Improve signal integrity, avoid ringing.

**Impact:** None.

### #3 Added pull-up resistors (10K) to SD-card (R23 .. R28 )

---

**Type:** SCH change

**Reason:** XILINX recommendation for SD connected without level shifter, avoid floating inputs when SD not used.

**Impact:** None.

### #4 Added series resistors 33 Ohm (R32, R21) on CLK and MIO28

---

**Type:** SCH change

**Reason:** Improve signal integrity, avoid ringing.

**Impact:** None.

## #5 Added testpoints

---

**Type:** SCH change

**Reason:** Prepare for automatic testing.

**Impact:** None, also 3.3V and GND available on testpoints.

## #6 Added ferrit beads L1 and L2

---

**Type:** SCH change

**Reason:** XILINX recommendation for clean power supply of XADC.

**Impact:** None.

## Method of Identification

---

The Revision number is printed on the top side of the PCB.

## Production Shipment Schedule

---

From January 2016, after old stock is gone.

## Contact Information
